# Naveed Khan

Calgary, AB | Canadian Citizen | +1 (587) 664-5696 | nkprimary1@gmail.com | GitHub | LinkedIn

## EDUCATION

**University of Calgary** — Calgary, AB
Bachelor of Science (B.Sc.), Software Engineering — Expected Graduation: Dec 2027
Relevant Coursework: Operating Systems, Cloud Computing, Data Structures, Computer Architecture, Distributed Systems

## SKILLS

**Languages:** Python, TypeScript, JavaScript, Java, Kotlin, Ruby, SQL, C/C++, C#
**Frameworks:** FastAPI, Flask, Rails, GraphQL, React, Next.js, React Native, Blazor, AlpineJS
**Infrastructure:** Kubernetes, EKS, Docker, Apache Flink, Kafka, Iceberg
**Cloud & Data:** AWS, Azure, GCP, PostgreSQL, MySQL, Elasticsearch, Snowflake, Databricks
**AI & Tooling:** OpenAI SDK, Anthropic SDK, Azure OpenAI, Claude Code, Cursor, Pi, Superset, RAG, OCR

## EXPERIENCE

**Shopify** — Toronto, ON
Software Engineering Intern - (Ruby on Rails, Kafka, MySQL, GraphQL, OpenAI SDK ) — Sep 2026 - Present

- **Cut action rejections ~20%** by patching a critical Pulse analytics defect, saving **~$3,800/day in total compute costs**
- Added **1.3 more recommendations/merchant** (5.7 → 7.0) across **430K+ merchants** by building an AI analytics pipeline
- **Surfaced new opportunities for 200K+ merchants** by grounding AI suggestions in Shopify data with **98% accuracy**

**Wealthsimple** — Toronto, ON
Software Engineering Intern (Kotlin, Flink, Kafka, PostgreSQL, GraphQL) — May 2026 - Aug 2026

- **Served GraphQL realized-return exports to 4M+ clients at 1.43s p95** via a Kotlin/Flink pipeline over 100M+ events
- Resolved 5+ client-impacting defects affecting **100K+ transactions and $2.05M in overstated net deposits**
- **Reconciled 828K+ ledger transactions** after a 6-hour SEV-1 by tracing and patching a production Flink dependency bug
- **Detected regressions in under 10 minutes** with an MCP-secured CI AI harness, avoiding $10K+ compute per incident

**Clio** — Calgary, AB
Software Engineering Intern (Ruby on Rails, MySQL, Datadog, AlpineJS, Turbo Streams) — Jan 2026 - Apr 2026

- **Expanded accounting coverage from 5 to 9 transaction types** by shipping 4 Rails/AlpineJS/Turbo Streams workflows
- **Lowered p95 latency 18%** by diagnosing bottlenecks in Datadog, refactoring Rails services, and tuning MySQL queries
- **Uncovered 50K+ malformed records** while resolving on-call tickets for user-reported data discrepancies
- Instrumented 20+ Segment analytic events capturing **10K+ monthly product interactions** across Locker feature rollouts

**Cenovus Energy** — Calgary, AB
Software Engineering Intern (FastAPI, Azure OpenAI, OCR, SAP, Databricks) — Sep 2025 - Dec 2025

- **Saved $250K+ and 500+ hours annually** by automating invoice checks with Azure OpenAI, SAP, and Databricks
- **Improved well-maintenance speed 20% and supported $750K savings** with Pason live data and Snowflake fallback

**City of Calgary** — Calgary, AB
Software Engineering Intern (PeopleSoft, Azure OpenAI, Kibana, Elasticsearch) — May 2025 - Aug 2025

- **Accelerated case resolution 25% for 200+ staff** with 4 PeopleSoft CRM dashboards in Kibana/Elasticsearch
- **Freed 500+ hours annually for 100+ employees** with a RAG assistant over 500+ documents using Azure OpenAI

**Alberta Health Services** — Calgary, AB
Software Engineering Intern (C#, Blazor, PowerShell, SharePoint) — Sep 2024 - Apr 2025

- Completed a **1M+ record SharePoint migration 1 month early** by automating data workflows with PowerShell
- Scaled eCampaign to **4M+ users** and **eliminated rebuild cycles** with dynamic survey loading in C# and Blazor
- Decreased **database load 17%** by resolving N+1 queries and optimizing access patterns across C# services

**University of Calgary** — Calgary, AB
Machine Learning Student Researcher (Python, scikit-learn, SQL) — May 2024 - Aug 2024

- Achieved an **F1 score of 0.9** using scikit-learn models trained on optimized two-phase saturation datasets in Python

## PROJECTS

**Trustline - FastAPI, Twilio, WebSockets, React Native** | 1st Place, NatIgnite ($6K)

- Built a real-time deepfake-call detector with **95%+ precision and 100% alert activation** in a 36-hour build

**Symptomfy - Flask, Gemini, Docker, GCP Cloud Run** | 3rd Place, SpurHacks ($2.5K; 1,500+ participants)

- Built an Akinator-style RAG symptom assessor delivering **sub-second ER/doctor/OTC guidance** on GCP Cloud Run
